

## December 30, 2016 Release Notes

The following is a list of enhancements made to the OMSNIC Resident Surgical Log (RSL) effective December 30, 2016.

### Changes to the “Off Service Anesthesia” Activity Form

---

1. New drop down fields added to identify any off service anesthesia procedure as ambulatory and/or an OMS procedure. These additional fields will ensure off-service anesthesia experiences are more accurately recorded, and therefore, allow Programs and residents to more easily identify, via reports, whether CODA anesthesia competency standards have been met.
  - New drop down field: Is this an OMS procedure?
    - Yes/No selections
  - New drop down field: Is this an ambulatory procedure (discharged same day)?
    - Yes/No selections
2. Local Anesthesia and Nitrous Oxide have been removed as drop down selections for the type of anesthesia administered. Any prior cases entered with these anesthesia types will remain unchanged.

### Changes to the “Procedure Log” Activity Form

---

1. Only procedures performed by residents as first assistant to the attending OMS count towards CODA standards. To clarify the intent of the “First Assistant” role, the drop down selections were redefined as:
  - “First Assistant to Attending OMS” (Previously “First Assistant”)
  - “First Assistant to Attending OMS and Anesthesiologist” (Previously “First Assistant and Anesthesiologist”)

**Note:** to ensure accurate documentation of anesthesia procedures, if the resident’s role includes the role of “Anesthesiologist”, the type of anesthesia administered should be recorded as a procedure.
2. To simplify the recording of anesthesia administered, the selection of anesthesia procedures was condensed to:
  - General/Deep Sedation (required for accreditation)
  - Moderate (Conscious) Sedation (not required for accreditation)

These selections can be found under the “Procedures” drop down menu, categorized as “Anesthesia”
3. Many residents previously selected CDT codes that had equivalent CPT codes that are considered in CODA standards. Any cases entered with these CDT codes would not be accurately reported in future CODA reports.
  - 95 CDT codes deleted and replaced with appropriate CPT codes

*A note on changes to the RSL: As is customary with all software tools, routine maintenance and product enhancements are necessary. OMSNIC and our software vendor strive to provide any required updates with little to no interruption for RSL end users. If you experience any disruption in your use of the RSL, please contact us immediately. All changes to the RSL are reviewed and approved by the OMSNIC RSL Advisory Committee. The Committee composition includes a representative from AAOMS, two Program Directors, two faculty members, and one resident. The intent of any change to the RSL is to improve usability, enhance the accuracy of case entry, and ensure data is recorded and reported effectively per CODA standards. Any questions regarding changes to the RSL should be directed to [RSLsupport@t-res.net](mailto:RSLsupport@t-res.net).*

## Automatic Re-coding Efforts

The above changes resulted in automatic re-coding efforts to ensure accurate reporting per CODA standards. Reference the below Re-coding Efforts Detail for specific code changes.

- Any cases previously recorded as “First Assistant” have been re-coded appropriately.
- Any cases previously recorded with CDT or CPT anesthesia codes were re-coded appropriately.
- Any cases previously recorded using the 95 deleted CDT codes were re-coded to reflect the appropriate CPT code.

## Best Practices Recommendations

The RSL Advisory Committee strongly encourages Training Programs to review these changes in detail. While automatic coding efforts help improve the accuracy of your case reports, it is recommended that all cases impacted by automatic re-coding efforts be reviewed. Additionally, it is recommended that residents review previously entered off service anesthesia cases to document cases that are ambulatory and/or OMS procedures and review any previously entered cases where their role included anesthesiologist to record the type of anesthesia administered as a procedure.

## Re-coding Efforts Detail

ANESTHESIA		
Code & Description	Action Taken	Replace With
00000 - General Anesthesia	Delete	General/Deep Sedation (required for accreditation)
11111 - Deep Sedation	Delete	General/Deep Sedation (required for accreditation)
D9223 - Deep sedation/general anesthesia (required for Accreditation)	Delete	General/Deep Sedation (required for accreditation)
D9243 - Intravenous moderate (conscious) sedation/analgesia (not required for Accreditation)	Delete	Moderate (Conscious) Sedation (not required for accreditation)
99143 - Moderate sedation performed by OMS, pt. age <5 yrs, first 30 min	Delete	Moderate (Conscious) Sedation (not required for accreditation)
99144 - Moderate sedation performed by OMS, pt. age >5 yrs, first 30 min	Delete	Moderate (Conscious) Sedation (not required for accreditation)
99145 - Moderate sedation performed by OMS, add'l 15	Delete	Moderate (Conscious) Sedation (not required for accreditation)
99148- Moderate sedation performed by another, pt. age <5 yrs, first 30 min	Delete	Moderate (Conscious) Sedation (not required for accreditation)
99149- Moderate sedation performed by another, pt. age >5 yrs, first 30 min	Delete	Moderate (Conscious) Sedation (not required for accreditation)
99150- Moderate sedation performed by another, add'l 30 min	Delete	Moderate (Conscious) Sedation (not required for accreditation)

CDT (Dentoalveolar)		
Code & Description	Action Taken	Replace With
D4320 - Provisional splinting - intracoronal	Delete	21085
D4321 - Provisional splinting - extracoronal	Delete	20999

*A note on changes to the RSL: All changes to the RSL are reviewed and approved by the OMSNIC RSL Advisory Committee. The Committee composition includes a representative from AAOMS, two Program Directors, two faculty members, and one resident. The intent of any change to the RSL is to improve usability, enhance the accuracy of case entry, and ensure data is recorded and reported effectively per CODA standards. Any questions regarding changes to the RSL should be directed to [RSL@omsnic.com](mailto:RSL@omsnic.com).*

CDT (Dentoalveolar)		
Code & Description	Action Taken	Replace With
D4381 - Localized delivery of antimicrobial agents via a controlled release vehicle into diseased crevicular tissue, per tooth	Delete	20999
D6100 - Implant removal, by report	Delete	20680
D7260 - Oroantral fistula closure	Delete	30580
D7261 - Primary closure of a sinus perforation	Delete	30580
D7285 - Incisional biopsy of oral tissue-hard (bone, tooth)	Delete	20240
D7286 - Incisional biopsy of oral tissue-soft	Delete	40808
D7287 - Exfoliative cytological sample collection	Delete	20999
D7288 - Brush biopsy - transepithelial sample collection	Delete	20999
D7340 - Vestibuloplasty - ridge extension (secondary epithelialization)	Delete	40810
D7350 - Vestibuloplasty - ridge extension (including soft tissue grafts, muscle reattachment, revision of soft tissue attachment and management of hypertrophied and hyperplastic tissue)	Delete	40844
D7410 - Excision of benign lesion up to 1.25 cm	Delete	11441
D7411 - Excision of benign lesion greater than 1.25 cm	Delete	11422
D7412 - Excision of benign lesion, complicated	Delete	11426
D7413 - Excision of malignant lesion up to 1.25 cm	Delete	11641
D7414 - Excision of malignant lesion greater than 1.25 cm	Delete	11642
D7415 - Excision of malignant lesion, complicated	Delete	40814
D7440 - Excision of malignant tumor - lesion diameter up to 1.25 cm	Delete	21044
D7441 - Excision of malignant tumor - lesion diameter greater than 1.25 cm	Delete	21044
D7450 - Removal of benign odontogenic cyst or tumor - lesion diameter up to 1.25 cm	Delete	21046
D7451 - Removal of benign odontogenic cyst or tumor - lesion diameter greater than 1.25 cm	Delete	21046
D7460 - Removal of benign nonodontogenic cyst or tumor - lesion diameter up to 1.25 cm	Delete	21046
D7461 - Removal of benign nonodontogenic cyst or tumor - lesion diameter greater than 1.25 cm	Delete	21046
D7465 - Destruction of lesion(s) by physical or chemical method, by report	Delete	17250
D7470 - Destruction of lesion(s) by physical or chemical method, by report	Delete	17250
D7472 - Removal of torus palatinus	Delete	21032
D7473 - Removal of torus mandibularis	Delete	21031
D7490 - Radical resection of maxilla or mandible	Delete	21047
D7510 - Incision and drainage of abscess - intraoral soft tissue	Delete	40800
D7511 - Incision and drainage of abscess - intraoral soft tissue - complicated (includes drainage of multiple fascial spaces)	Delete	40801
D7520 - Incision and drainage of abscess - extraoral soft tissue	Delete	41017
D7521 - Incision and drainage of abscess - extraoral soft tissue - complicated (includes drainage of multiple fascial spaces)	Delete	41017
D7530 - Removal of foreign body from mucosa, skin, or subcutaneous alveolar tissue	Delete	41805
D7540 - Removal of reaction producing foreign bodies, musculoskeletal system	Delete	20520
D7550 - Partial ostectomy/sequestrectomy for removal of non-vital bone	Delete	41830
D7560 - Maxillary sinusotomy for removal of tooth fragment or foreign body	Delete	31030
D7610 - Maxilla - open reduction (teeth immobilized, if present)	Delete	21422
D7620 - Maxilla - closed reduction (teeth immobilized, if present)	Delete	21421

A note on changes to the RSL: All changes to the RSL are reviewed and approved by the OMSNIC RSL Advisory Committee. The Committee composition includes a representative from AAOMS, two Program Directors, two faculty members, and one resident. The intent of any change to the RSL is to improve usability, enhance the accuracy of case entry, and ensure data is recorded and reported effectively per CODA standards. Any questions regarding changes to the RSL should be directed to [RSL@omsnic.com](mailto:RSL@omsnic.com).

<b>CDT (Dentoalveolar)</b>		
<b>Code &amp; Description</b>	<b>Action Taken</b>	<b>Replace With</b>
D7630 - Mandible - open reduction (teeth immobilized, if present)	Delete	21462
D7640 - Mandible - closed reduction (teeth immobilized, if present)	Delete	21451
D7650 - Malar and/or zygomatic arch - open reduction	Delete	21360
D7660 - Malar and/or zygomatic arch - closed reduction	Delete	21355
D7670 - Alveolus - closed reduction, may include stabilization of teeth	Delete	21440
D7671 - Alveolus - open reduction, may include stabilization of teeth	Delete	21445
D7680 - Facial bones - complicated reduction with fixation and multiple surgical approaches	Delete	21365
D7710 - Maxilla - open reduction	Delete	21422
D7720 - Maxilla - closed reduction	Delete	21421
D7730 - Mandible - open reduction	Delete	21462
D7740 - Mandible - closed reduction	Delete	21451
D7750 - Malar and/or zygomatic arch - open reduction	Delete	21360
D7760 - Malar and/or zygomatic arch - closed reduction	Delete	21355
D7770 - Alveolus - open reduction stabilization of teeth	Delete	21440
D7771 - Alveolus, closed reduction stabilization of teeth	Delete	21445
D7780 - Facial bones - complicated reduction with fixation and multiple surgical approaches	Delete	21365
D7810 - Facial bones - complicated reduction with fixation and multiple surgical approaches	Delete	21365
D7820 - Closed reduction of dislocation	Delete	21480
D7830 - Manipulation under anesthesia	Delete	21073
D7840 - Condylectomy	Delete	21050
D7850 - Surgical discectomy, with/without implant	Delete	21060
D7852 - Disc repair	Delete	21240
D7854 - Synovectomy	Delete	20605
D7856 - Myotomy	Delete	40845
D7865 - Arthroplasty	Delete	21240
D7870 - Arthrocentesis	Delete	20605
D7873 - Arthroscopy - surgical: lavage and lysis of adhesions	Delete	29804
D7880 - Occlusal orthotic device, by report	Delete	21085
D7910 - Suture of recent small wounds up to 5 cm	Delete	13133
D7911 - Complicated suture - up to 5 cm	Delete	13131
D7912 - Complicated suture - greater than 5 cm	Delete	13152
D7920 - Skin graft (identify defect covered, location and type of graft)	Delete	15120
D7940 - Osteoplasty - for orthognathic deformities	Delete	21122
D7941 - Osteotomy - mandibular rami	Delete	21196
D7943 - Osteotomy - mandibular rami with bone graft; includes obtaining the graft	Delete	21196

*A note on changes to the RSL: All changes to the RSL are reviewed and approved by the OMSNIC RSL Advisory Committee. The Committee composition includes a representative from AAOMS, two Program Directors, two faculty members, and one resident. The intent of any change to the RSL is to improve usability, enhance the accuracy of case entry, and ensure data is recorded and reported effectively per CODA standards. Any questions regarding changes to the RSL should be directed to [RSL@omsnic.com](mailto:RSL@omsnic.com).*

<b>CDT (Dentoalveolar)</b>		
<b>Code &amp; Description</b>	<b>Action Taken</b>	<b>Replace With</b>
D7944 - Osteotomy - mandibular rami with bone graft; includes obtaining the graft	Delete	21196
D7945 - Osteotomy - body of mandible	Delete	21198
D7946 - Lefort i (maxilla - total)	Delete	21145
D7947 - Lefort i (maxilla - segmented)	Delete	21146
D7948 - Lefort ii or lefort iii (osteoplasty of facial bones for midface hypoplasia or retrusion) - without bone graft	Delete	21154
D7949 - Lefort ii or lefort iii - with bone graft	Delete	21154
D7950 - Osseous, osteoperiosteal, or cartilage graft of the mandible or maxilla - autogenous or nonautogenous, by report	Delete	21215
D7955 - Repair of maxillofacial soft and/or hard tissue defect	Delete	13131
D7960 - Frenulectomy - also known as frenectomy or frenotomy - separate procedure not incidental to another procedure	Delete	40819
D7963 - Frenuloplasty	Delete	40819
D7970 - Excision of hyperplastic tissue - per arch	Delete	41820
D7971 - Excision of pericoronal gingiva	Delete	41821
D7972 - Surgical reduction of fibrous tuberosity	Delete	41822
D7980 - Sialolithotomy	Delete	42335
D7982 - Sialodochoplasty	Delete	42500
D7983 - Closure of salivary fistula	Delete	42408
D7990 - Emergency tracheotomy	Delete	31603
D7991 - Coronoidectomy	Delete	21070
D7997 - Appliance removal (not by dentist who placed appliance), includes removal of archbar	Delete	20670
D7998 - Intraoral placement of a fixation device not in conjunction with a fracture	Delete	21497
D7999 - Unspecified oral surgery procedure, by report	Delete	20999

*A note on changes to the RSL: All changes to the RSL are reviewed and approved by the OMSNIC RSL Advisory Committee. The Committee composition includes a representative from AAOMS, two Program Directors, two faculty members, and one resident. The intent of any change to the RSL is to improve usability, enhance the accuracy of case entry, and ensure data is recorded and reported effectively per CODA standards.
